Table of Contents

Author Index	3-34
Source Index	35-80
Subject Index	81-567

Note:

There are three separate indices in this annual cumulative index to *Linguistics and Language Behavior Abstracts* Volume 22 (1988): author index, source publication index, and subject index. All references to abstracts contained in *LLBA* are by the abstract number which precedes each abstract.

The *author index* is a name and not a person index. Rules of alphabetization are applied by computer. No attempt has been made to consolidate multiple entries for the same person if his or her name was not listed exactly the same way every time it appeared in the source publications referenced.

The *subject index* contains descriptive phrases intended to provide information about the contents of each article abstracted. This information may include the general subject matter or the dependent variable(s); the independent variable(s); tests; population; and additional information such as book review, case report, conference proceedings, review of the literature, etc.

The *source publication index* includes the full title, subtitle(s), and current subscription address of each publication screened for articles which satisfy the *LLBA* selection criteria. References to articles abstracted from each publication, if any, are by year, volume, issue, sequence number, month/season, and pagination.
